

Dr. Nicole Biebow

Dr. Nicole Biebow is **Chair of the Board of the German Marine Research Alliance** (Deutsche Allianz Meeresforschung, DAM).

Prior to joining DAM, she headed the **International Cooperation Unit at the Alfred Wegener Institute, Helmholtz Centre for Polar and Marine Research (AWI)**, where she was responsible for the Institute's international relations. Over many years, she has built an extensive network across the European and international research and policy communities, with a particular focus on international scientific cooperation and the science–policy interface.

She **coordinated the EU projects EU-PolarNet and EU-PolarNet 2**, which brought together the European polar research community and provided strategic advice to the European Commission on polar research. She also **coordinated POLARIN** (Polar Research Infrastructure Network), a major European initiative bringing together 64 research infrastructures across the Arctic and Antarctic, including research vessels, research stations and observing systems, and providing researchers with transnational access to these facilities.

Nicole Biebow holds a **PhD in Marine Geology from GEOMAR** in Kiel.
